Get serious. Dive for data the right way.

DeepSpar Start-Up Checklist

Are you SURE you have everything you need to start a successful DR business?

Check how prepared you are NOW.

If you don't have everything on this list, you are not prepared to become a professional data recovery company.

Technology Tools:

- A disk imaging tool that is built specifically for the data recovery industry. Y/N
- A disk imaging tool that automates time-consuming tasks such as information about files to be recovered, and uploading recovered data. Y/N
- Integration between all of your technology and business data recovery tools. Y/N

Training:

- Training on hard disk drive design and theory and a solid understanding of the typical causes of hard drive failure. Y/N
- Training on the three phases of the data recovery process and how to identify problems in each of the three phases. Y/N
- Training on a systematic professional data recovery methodology that ensures maximum data for each recovery. Y/N
- Product training for your data recovery tools which includes training on how to use the product in the data recovery process. Y/N
- Hands-on training by data recovery experts on most common data recovery cases with common hard drives. Y/N
- Introduction to how hard drives work and the knowledge to start practicing mechanical repair with broken drives Y/N

DeepSpar Start-Up Checklist

Case Support:

- Push-button access to data recovery experts who can troubleshoot your cases remotely and tell you how to recover them.  
- Relationships with certified data recovery companies that can handle cases beyond your expertise.

Business Systems:

- A communication management system that professionalizes and automates critical customer communication tasks.  
- 24/7 online forum where you can collaborate with other data recovery experts.

Business Advice:

- A professional review and discussion of your business and technical processes and advice on what you need to start your professional data recovery company.  
- A roadmap for starting up and growing your business – including advice on technology, types of cases, systems, pricing models, and quoting strategies.

Low-Risk Start-Up Plan:

- Minimal set-up fees for tools, training and support – less than $500/month – not the $1,000s and $10,000s usually required.
